DETAILED ACTION

Claims 1, 34-36, 39-55, 95-113 are currently pending and are present for examination.

Applicants' amendments and arguments filed on 1-15-04, have been fully considered and are deemed to be persuasive to overcome the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn.

Drawings

Drawings submitted in this application are accepted by the Examiner for examination purposes only.

EXAMINER'S AMENDMENT

An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on 1-27-04, Courtney Cox requested an extension of time for 1 MONTH(S) and authorized the Director to charge Deposit Account No. 19-0741 the required fee of \$ 2,010 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

A) Cancel claim 109 without any prejudice.

Allowable Subject Matter

Claims 1, 34-36, 39-55, 95-108, 110-113 are allowed.

The following is an examiner's statement of reasons for allowance: Following a diligent search it was determined that the prior art neither teaches nor suggests a composition comprising an enzyme that effects the cleavage of a linkage that is comprised of a phosphatidylinositol and that membrane-anchors a surface protein or a carbohydrate on a pathogen whereby said cleavage effects release of said surface protein or carbohydrate wherein said composition is suitable for oral administration to a host and wherein said cleavage interferes with pathogen binding to a host cell in the intestines such that the infective ability of said pathogen to said host cell is reduced. In order to allow above claims Examiner has considered the exhaustive arguments by the applicant and a clear showing that not all enzymes are capable of remaining active in the intestines of hosts and it is the that novel property of the claimed enzyme that sets it apart from other known enzymes used in foods and feeds.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manjunath N. Rao, Ph.D. whose telephone number is 571-272-0939. The examiner can normally be reached on 6.30 a.m. to 3.00 p.m.
